

APRIL National Donate Life Month

As we have opportunity, let us do good to all people.
– Galatians 6:10

You can save a life! April is National Donate Life Month. It features local, regional and national activities to educate and encourage Americans to register as organ, eye and tissue donors, as well as to celebrate those who have saved and healed lives through the gift of donation. Some statistics to think about as we celebrate this life-saving theme throughout April:

- More than 100,000 men, women, and children await lifesaving organ transplants.
- Every 10 minutes another person is added to the waiting list.
- 22 people die each day because the organs they need are not donated in time.
- 83% of patients waiting are in need of a kidney.
- 12% of patients waiting are in need of a liver.
- 3–5 years is the average waiting time for a kidney from a deceased donor.
- Living donors can provide a kidney or a portion of their intestine, liver, lung, or pancreas to a waiting patient.

At MLH: Nationally recognized for its success with kidney, liver, and pancreas transplants, Methodist recently dedicated the James D. Eason Transplant Institute at the new Methodist University Hospital Shorb Tower to conveniently consolidate both inpatient and outpatient services. Dr. Eason is a long-time Memphis transplant surgeon who serves as program director of the institute and has been a passionate advocate for organ donation.
