

AUGUST
**National
Immunization
Awareness**

*But I will restore you to health and heal your wounds,
declares the Lord.*

– Jeremiah 30:17

August is National Immunization Awareness Month.

National Immunization Awareness Month (NIAM) highlights the importance of vaccination for people of all ages. Throughout August, communities across the country work to raise awareness about the important role of vaccines in personal and public health. Vaccination helps prevent the spread of disease, especially to those who are most vulnerable to illness, such as infants and young children, elders, and those with chronic conditions or weakened immune systems.

At MLH: Having a primary care physician is an essential part of staying healthy. Our primary care network, called the **Methodist Medical Group**, includes physicians and nurse practitioners at practices conveniently located throughout Memphis and the surrounding area. Your primary care doctor should be your first stop for non-emergency health issues and can make sure that you are up to date on life-saving immunizations. For more information, call the **Methodist Medical Group** at **(901) 758-9898**.

OUR FAITH-BASED MISSION

Our mission is to collaborate with patients and families to be the leader in providing **high-quality, cost-effective, patient- and family-centered care** in a manner which supports the health ministries and Social Principles of the United Methodist Church to benefit the communities we serve.
